"Excellent service from Solutions for Accounting from setting up the training to delivering via Teams. Everything went smoothly.

The trainer had discussed our requirements prior to delivering the required sessions. He was very patient with our questions and willingly went over certain items a number of times to ensure that we had all understood the content. Extremely satisfied with the content and quality of training on Sage 50 Accounts.

Speedy delivery of Consultation and other required Reports. Wouldn't hesitate to recommend Solutions for Accounting."

"Can't ask for anything more, quick responses and very knowledgeable. If there's a query one of the team can't answer immediately, they will be able to answer after some research. I've raised dozens of tickets over the last couple of years and I can't remember one instance where an issue hasn't been resolved in a timely/satisfactory manner."

"After discussions on how we use our Sage software and an overview of our manufacturing business, Solutions for Accounting have really impressed me with their great knowledge on how Sage can do a lot more for our business than we thought!

Consultancy / training is ongoing in small chunks. Numerous advantages have come from this, one of which is time allowing us to focus on other areas of our business.

They have a very helpful team who I have full confidence in to get the best out of our Sage software. Solutions for Accounting Team you should be proud of your work ethic and how you look after your customers. Thank you for what you have done so far and for ongoing projects."

"First class support service: Solutions for Accounting has provided our organisation with exceptional support for many years."

Our recent dealings with them have surpassed our expectations. With a team of experts they have always been able to resolve our issues, both quickly and to our complete satisfaction. We have been particularly impressed with their ability to produce bespoke add-on software and their in-depth knowledge of Report Writer which has its own very unique query language. The products they have helped us to produce have enhanced our working practices, made processes more efficient (saved time) and improved accuracy.

"We have received exceptional support from Solutions for Accounting and would have no hesitation recommending them to future clients."
