

Fixed Asset Code Changer/ Merger

Sage Business Partner

Solutions
for **Accounting**

Quickly and easily change or merge codes in Sage 50cloud Accounts

Solutions for Accounting' Fixed Asset Code Changer solution allows you to change your Sage asset account data which is not possible within Sage Accounts itself, you currently have to create a new Fixed Asset Record. We understand the frustration finance teams have with evolving your system to meet current business needs, so our software has been designed to allow you do this whilst retaining full transaction history.

Businesses evolve over time and your software needs to be able to reflect these changes. With our Fixed Asset Code Changer, you can change the code of Fixed Assets within your Sage 50cloud Accounts programme and can dispose of any unwanted ones at any time.

FEATURES:

- Fixed Asset Records within Sage only affect one single area of the program and are posted during the month end process
- Use to formalise or re-categorise your Fixed Asset Records

BENEFITS:

- ✓ Edit multiple codes with a click of a button
- ✓ Retain full transaction history
- ✓ Clear and concise code structure
- ✓ Better management and organisation of Sage 50cloud Accounts
- ✓ Update your Sage 50cloud Accounts to reflect new business changes

It is important to note that;

The only caveats for changing a Fixed Asset Record are that it must follow the Sage standard structure for Fixed Assets;

- No spaces, 16 or fewer characters
- The new reference must not already exist

Everyone **MUST** be logged out of Sage Accounts to run this program

We recommend a backup!

Every time you change/merge, you **MUST** restart the Sage Data Service on ALL PCs running Sage

SAVE MONEY – GET THE CODE CHANGER/MERGERS BUNDLE!
